RESUME

Nnanna Okechukwu **Jason**

FULL-STACK DEVELOPER / AI INTEGRATION

nnannaokechukwu1@gmail.com · 0708 306 6127 · Imo State, Nigeria
wintas01.github.io/portfolio01 · github.com/wintas01

Computer Science graduate (2026) and full-stack developer who builds with AI. Delivered a university e-library and website, a ticketing platform, a VTU payments app, and an AI content bot, using AI as a core part of how I design, write, and ship software. Experienced integrating LLM APIs into real products and working in a team on a live university website; eager to join teams building useful, polished software.

SKILLS

PROFESSIONAL

- Full-stack web development
- AI integration (LLM APIs)
- AI-assisted development
- Prompt engineering
- Team collaboration

TECHNICAL

- TypeScript, HTML, CSS
- Supabase
- Vercel
- Cloudflare AI API
- Git / GitHub
- Networking fundamentals

EDUCATION

GRADUATED 2026

B.SC. COMPUTER SCIENCE

Kingsley Ozumba Mbadiwe University, Ideato

PROJECTS

FULL-STACK — FRONTEND & BACKEND

KOMU E-LIBRARY

- Built the frontend and backend of the university's e-library for e-books, journals, and theses.
- Search across 19+ research databases, available on campus and remotely, 24/7.

Live: komu-elibrary.vercel.app

TEAM PROJECT — FULL-STACK DEVELOPER

KOMU WEBSITE REDESIGN

- Full-stack developer in the team that redesigned the official KOMU university website.
- Contributed to both the frontend and the backend of the new site, which is now live.

Live: komu.edu.ng

EVENT TICKETING PLATFORM

TIXORA

- Ticketing platform to find concerts, parties, dinners, and shows and book in seconds.
- Checkout by card, bank transfer, or USSD, with a QR ticket issued right after payment.
- One scan at the door: no paper tickets, no queues, no fakes.

Launching soon

INSTANT TOP-UP WEB APP

OJ SUB VTU PLATFORM

- Built a VTU platform for cheap data and airtime, electricity bills, TV, and school fees.
- Added a marketplace where users can sell items, with an installable app version.

Live: sabuss.com/ojsub3

CLOUDFLARE AI API · SUPABASE · VERCEL

CHURCH FACEBOOK AUTO BOT

- Generates posts and images with the Cloudflare AI API and auto-publishes them to Facebook.
- Stores content in Supabase and runs on Vercel, so no manual daily posting is needed.
