RESUME

Nnanna Okechukwu **Jason**

SOFTWARE BUILDER / FULL-STACK DEVELOPER

e: nnannaokechukwu1@gmail.com | **p:** 07083066127 | Imo State, Nigeria
w: wintas01.github.io/portfolio01 | **gh:** github.com/wintas01

Fast-moving software builder focused on web applications, AI integrations, and rapid prototyping. Skilled at writing effective AI prompts and applying machine learning tools to turn product ideas into working, deployed apps. Experienced working in a team on a live university website, and eager to contribute to early-stage builds, open-source projects, and collaborative teams.

SKILLS

PROFESSIONAL

- Full-stack web development
- AI API integration
- Prompt engineering

- Team collaboration

TECHNICAL

- TypeScript, HTML, CSS
- Supabase
- Vercel
- Cloudflare AI API
- Git / GitHub
- Networking fundamentals

EDUCATION

IN PROGRESS

B.SC. COMPUTER SCIENCE

Kingsley Ozumba Mbadiwe University, Ideato

PROJECTS

TEAM PROJECT — FULL-STACK DEVELOPER

KOMU WEBSITE REDESIGN

Redesign of the official website of Kingsley Ozumba Mbadiwe University.

- Worked as a full-stack developer in the team that redesigned the university's website.
- Contributed to both the frontend and the backend of the new site, which is now live.

INSTANT TOP-UP WEB APP

OJ SUB VTU PLATFORM

Nigerian VTU platform for everyday payments and top-ups.

- Built a platform for buying cheap mobile data and airtime and paying electricity bills, TV subscriptions, and educational fees.
- Added a marketplace where users can sell items, with an installable app version.

CLOUDFLARE AI API · SUPABASE · VERCEL

CHURCH FACEBOOK AUTO BOT

Automated content platform that keeps a church's Facebook Page active.

- Generates posts and images with AI and publishes them automatically to a Facebook Page.
- Uses the Cloudflare AI API for text and image generation and Supabase for the database.
- Hosted on Vercel, removing the need for manual daily posting.
