Nnanna Okechukwu Jason

Software Builder | AI-Assisted Full-Stack Development

nnannaokechukwu1@gmail.com | 07083066127 | Imo State, Nigeria
Portfolio: wintas01.github.io/portfolio01 | GitHub: github.com/wintas01

PROFESSIONAL SUMMARY

Fast-moving software builder focused on web applications, AI integrations, and rapid prototyping. Skilled at writing effective AI prompts and applying machine learning tools to turn product ideas into working, deployed apps. Experienced working in a team on a live university website, and eager to contribute to early-stage builds, open-source projects, and collaborative teams.

TECHNICAL TOOLKIT

Languages	TypeScript, HTML, CSS
Platforms & Backend	Supabase (database), Vercel (deployment), Cloudflare AI API
AI Workflow	Prompt engineering, machine learning, AI API integration, AI-assisted development
Tools	Git/GitHub, networking fundamentals

FEATURED PROJECTS

KOMU University Website Redesign

Team project | Full-stack developer

- Worked as a full-stack developer in the team that redesigned the official website of Kingsley Ozumba Mbadiwe University.
- Contributed to both the frontend and the backend of the new site, which is now live.

Live: komu.edu.ng

OJ Sub VTU Platform

Instant top-up web app | Payments & bills

- Built a VTU platform for buying cheap mobile data and airtime and paying electricity bills, TV subscriptions, and educational fees.
- Added a marketplace where users can sell items, with an installable app version.

Live: sabuss.com/ojsub3

Church Facebook Auto Bot

Automated content platform | Cloudflare AI API, Supabase, Vercel

- Built and deployed a web app that generates posts and images with AI and publishes them automatically to a Facebook Page.
- Used the Cloudflare AI API for text and image generation and Supabase for the database.
- Hosted on Vercel, removing the need for manual daily posting.
